

Suggested Uses

Veterinarians

X-O Odor Neutralizer eliminates dog, cat, pet and animal odors naturally and safety.

Veterinarians nationwide rely on the natural, non-toxic, pH-neutral plant-based formula of X-O Odor Neutralizer to remove the strong, industrial and sometimes hazardous smells involved in medical procedures and waste while being safe for the animal patients and their loving owners.

X-O products address environmental maintenance and provide meet industrial cleaning standards with absolute safety for people and the environment.

Clinic:

- For Parvo, anal glands and estrus odors - spray XR or PR into the air or directly on the animal or surface. (X-O sprays are safe, but avoid the eyes).
- Spray to the skin of the animal to relieve itching and pain associated with insect bites and skin disorders.
- Spray examination table with PR to clean up between patients.

Grooming-Shampoo:

- Dilute 1 oz. PC with 1 gallon of water.
- Gently pour X-O solution over the pet, work into his coat (avoid the eyes) and rinse.

- Use PR as a grooming spray.

Kitty litter / Manure Piles:

- Spray five to six puffs of XR or PR on the kitty litter daily.
- Saturate manure piles with 1 oz PC per gallon of water.

Cages/Kennels & Carriers:

- Spray/wipe out cages after removing 'solids'.
- Use 1 oz. PC per gallon of water.
- Optionally, Attach a hose end proportioner full of PC solution, spray down and allow to dry (no rinse needed).

Dog runs:

- Spray diluted XC through a horticulture sprayer or hose end proportioner.

Show pets & hunting dogs in heat:

- For estrus odors, spray XR or PR to genitals shortly before show event begins.
- Spray hunting dogs to reduce give-away smell.
- Spray clothes and skin to eliminate your human odor when hunting.

Skunk:

- Spray the pet with XR or PR.
- Bathe with 1 oz PC per gallon of water.
- Rinse with clean water and dry.

Dead Animal pick up:

- Spray directly on the carcass before picking up.
- After washing truck bed, spray with XR or PR.
- Spray clothing.

Note:

- When using bleach as a sanitizer, rinse with clean water and then spray with X-O
